

Meet Baghera

I am a 2 yr old neutered male kitty.

I weigh about 13 lbs with short shiny hair.

I love affection and cuddle time, but I am also still young and playfull. I get along well with everyone, even the other hospital kitty.

I am FELV/FIV negative. Have had a complete vaccine series for FVRCP, FELV and Rabies. I am currently on Revolution for flea, tick and heartworm prevention.

I would love a family to call my own.

Please consider adopting me.
