

COURTESY LISTING

Mango and Baby

My name is Theresa and my sister, Catherine has stage 4 head and neck cancer. Due to her declining health Catherine needs to re home her two kitty brothers, Mango and Baby. Mango has catnip in his DNA and Baby will give high-fives for a treat! They were rescues in 2021. Their Mommy was abandoned in an apartment complex. Shortly after taking in Pearl, she had four babies and Catherine adopted two of them and I took the other two. Unfortunately Catherine is now bedridden in care at home and her daily care needs are increasing. I am helping her to find an agency who can take these darling boys and give them the chance to find the love and attention they deserve in a forever home. They are neutered. They will come with 60 cans of food, litter and a double-decker kitty enclosure. Cancer affects the whole family, including the fur babies. Please let me know if you are able to help with these kitties.

Thank you,

Theresa
