Alice Needs A New Home

Alice
7 years old
Female
Spayed
Current on Vaccines

Alice has been both an indoor and outdoor cat. She is very much a lap cat with her favorite people and is very playful, even playing fetch occasionally. She randomly snuggles in bed and can run like crazy. She is 7 years old. She does not like other cats and the few exposures that she has had to dogs shows that she is fearful but curious. She has warmed up to some of our visiting friends and family over time, but usually makes herself scarce if we have company of more than a couple of people.
